

HIGH TECHNOLOGY FOR HIGH PERFORMANCE – MAXIMIZE PRESCRIPTION VOLUME WITHOUT REMODELING

Accurately automates up to 60% of countable prescription medications

Faster than any comparable pharmacy robotic system at 200+ prescriptions per hour. Speeds prescription fulfillment with 220 factory-calibrated canister – 99.99% dispensing accuracy.

Enhance safety with direct dispensing

The FastFill 220 is a direct fill system, which means that each medication is dispensed from its own location. This eliminates the risk of cross contamination, since there is no central chute.

Maximize precious pharmacy space

Compact footprint (2'5" W x 8'5" L x 6'6" H) is almost identical to one row of traditional aisle shelving, making it easy to boost productivity without expensive or disruptive remodeling. Simple to install: no special wiring, power or air is required and set-up is done in a matter of hours.

Speed, safety, simplicity

Ergonomic design streamlines your pharmacy's operation. Smart tags ensure canisters only dispense from their appropriate locations. Random-load vial bins save time during refilling. FastFill 220 continues operation while canisters and vial bins are replenished. Barcode-driven replenishment ensures accuracy.

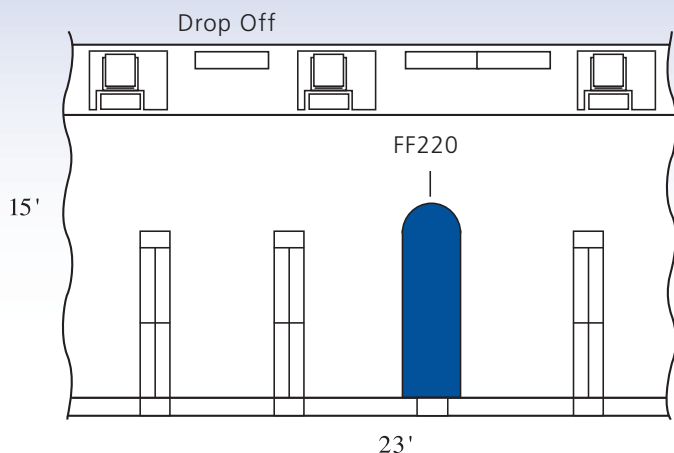

Efficiency WorkPath® System (optional) enhances safety

Decreases the likelihood of medication errors with image and barcode scan verification. The software integrates with your Pharmacy Information System and manages the fulfillment of all orders, whether filled by automation or manually.

The FastFill 220 is the fastest store-level robotic instrument at 200+ filled, labeled prescriptions per hour. Add Efficiency WorkPath System workflow software and ergonomic shelving for a comprehensive operating efficiency solution.

THE FASTFILL 220 IS THE FASTEST STORE-LEVEL ROBOTIC DEVICE AT 200+ FILLED, LABELED PRESCRIPTIONS PER HOUR.

*Typical pharmacy floor plan with **FastFill 220***
The FastFill 220 fits anywhere a row of traditional aisle shelving currently occupies. Minimal remodeling and disruption make installation simple.

Rx Volume:

For pharmacies averaging 400-1,000+ prescriptions per 10-hour shift accommodates even greater peak volumes
Automates up to 60% of countable prescriptions.

Processing Speed:

200+ filled, labeled prescriptions per hour

Components:

FastFill 220 direct-fill robotic dispensing system
220 factory-calibrated canisters
Microsoft Windows® 2003 server with monitor and hub
Microsoft Windows® XP client computer with touch screen monitor
AutoMed Messaging System (AMS) Software
UPS for server, client and FastFill 220
Onboard label printer
Barcode scanner
Biometric scanner

Options:

Efficiency WorkPath® System dispensing workflow software
StockFlow® shelving for replenishment/work station

Specifications:

Oral Solid Canisters:
220 factory-calibrated canisters;
650 cc; 99.99% dispensing accuracy

Vial Size: 20, 40 dram

Software: Windows® XP

Interfaces: File transfer, HL7 messaging or ODBC transferred via diskette, on-line serial or network communications and TCP/IP messaging

Dimensions: 2'5" W x 8'5" L x 6'6" H

Footprint/Weight: 1,600 lbs.

Power Requirements: Standard power source, 115v, 60Hz, 10 amps

StockFlow® Shelving System (Optional)

StockFlow shelving gives you more efficient storage capacity and work area in less space.

Recommended:

Two 1-bay units of FastFill Replenishment/Work Station (SF350X00).

Efficiency WorkPath® System (Optional)

For maximum safety, accuracy and process improvement, the FastFill 220 can be integrated with the Efficiency WorkPath System, a complete dispensing workflow management system. It streamlines the fulfillment process of both automated and manually picked orders throughout the entire pharmacy. This decreases the likelihood of medication errors, maximizes pharmacy productivity and enables barcoding on all dosage forms.

Interfaces: HL7 and TCP/IP messaging over network communications

Power Requirements: 110V, 60Hz, 15 amps

Options: Custom labels, additional workstations, Image Capture Station
