

A Clinical Performance Solution

Smart. Simple. Safe.

MedSelect® Automated Medication Dispensing and Management Systems from AmerisourceBergen

AmerisourceBergen®

Get exactly what you need, where you need it, with MedSelect® automated medication dispensing and management systems.

Now your nursing staff can benefit from AmerisourceBergen, the same source that your pharmacy trusts for enhanced clinical performance and operational efficiencies.

With MedSelect medication dispensing solutions, you now have a comprehensive suite of pharmacy automation and patient safety solutions that help to redefine the entire pharmaceutical supply chain. Let MedSelect help you drive to safer clinical practices, improved nursing staff satisfaction and greater efficiencies across your entire medication delivery spectrum.

Since 1993, hospitals have relied on MedSelect systems to safeguard their medication management procedures. MedSelect systems are built to last. But if service is needed, our 24/7 phone support and on-site service by 2,600 service professionals in 400 locations means support is always available.

MedSelect perfectly manages all your medications and med/surg supplies in a decentralized – or combination/hybrid – environment. MedSelect is ideal for your pharmacy, nursing units, ER, OR, skilled nursing facilities and critical care environments. MedSelect systems offer what matters most to you and your staff:

Smart engineering – with reliable components that work every time and keep service calls to the bare minimum

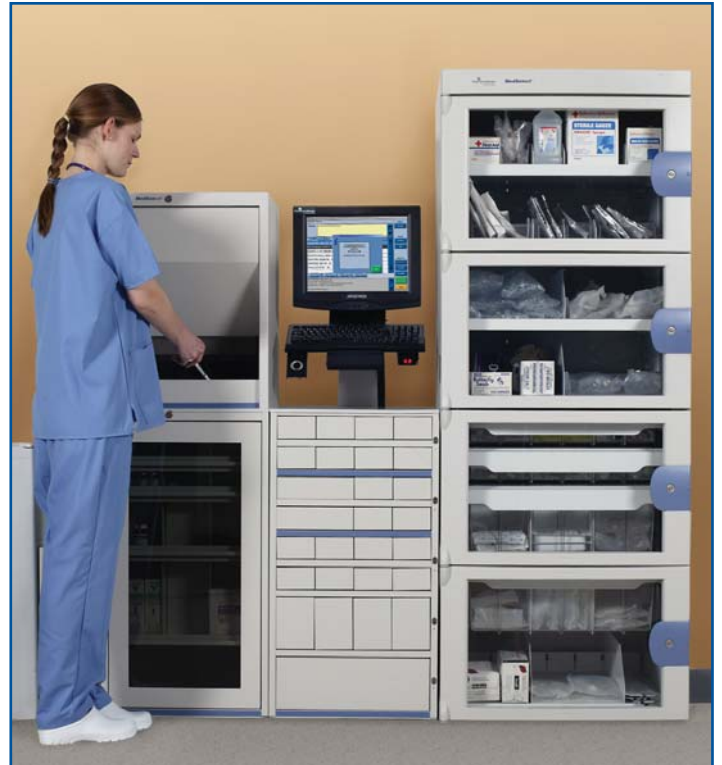

Built-in safety controls – to ensure patients get the right medication when and where they need it

Space-saving designs – because one-size-fits-all doesn't fit all, MedSelect offers a range of modular, scalable units

Time-saving features and fast access – saves nursing up to 30 minutes per shift, just by eliminating shift counts

Analytical tools – to help you quickly spot usage trends in your facility

Assurance – the kind that comes from AmerisourceBergen-backed technology

“The goal is to reduce the potential for medication errors. This technology is helping us do that.”

Greg George, RPh,
Director of Pharmacy, Holy Spirit Hospital, PA

MedSelect® automated medication dispensing cabinets

With MedSelect decentralized cabinets, your nursing staff spends less time and energy on medication retrieval and more time on patient care. MedSelect makes access to all medications safe, simple and secure.

Designed for the busy nurse

- Save up to 30 minutes per shift: single-dose dispensing via unit dose module delivers exact quantities, and eliminates counting of controlled substances
- Sign in, retrieve medications, and sign out in less than 15 seconds
- Biometric readers, ID card swipe and PIN entry options
- Color-coded commands for quick task identification

Intelligent yet rugged construction

- Built to last: steel skin handles abuse
- Drawers and mechanics are reliable, with no temperamental pocket lids
- Modular design in a small footprint: buy only the cabinets you need, and add on when your needs change
- Large touch screen monitors can adjust for any height

Examiner™ puts information at your fingertips

- The customizable Examiner report writing system gives you access to and interpretation of all your data
- One-time nominal licensing cost without expensive monthly fees
- Search active data from the past five years – not just 30 days – for trends and outliers
- Optional DrugPoints® database from Thomson Micromedex puts medication information at your fingertips

“Many of our med rooms have extremely tight quarters. MedSelect’s cabinets were the only ones that had enough flexibility to meet our needs.”

Tom Lausten, RPh
Director of Pharmacy
Children’s Hospital & Health System, WI

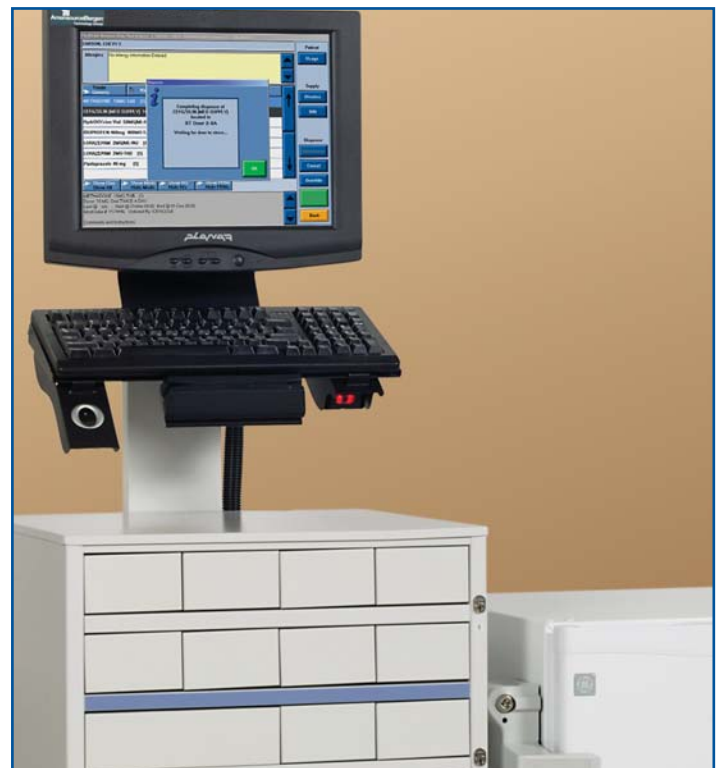

Protect patients with MedOrders™ profiling

- Supports your health system’s JCAHO compliance
- MedOrders™ software narrows the selection to medications that have been ordered by the physician and approved by pharmacy at the frequency specified
- Pharmacy-defined clinical message alerts are linked to the drug at the formulary level
- Safety alerts display patient allergies and flag all-too-frequent PRN dispenses

Powerful, flexible system administration

- Oracle® database provides virtually instantaneous response time
- Fits facilities using medication cabinets for 100% of dispensing or facilities using a hybrid cart/cabinet configuration
- Manage multiple facilities from one server, or multiple servers from one IT location
- Access MedSelect administration software from any licensed workstation, not just at the central console

DrugPoints is a registered trademark of Thomson Healthcare, Inc.
Oracle is a registered trademark of Oracle Corporation.

SupplySelect™ automated supply dispensing and management cabinets.

SupplySelect integrates with MedSelect cabinets for a comprehensive storage and tracking system. It's your facility's best defense against lost time retrieving supplies, lost product, and lost usage data.

Enhance productivity through better inventory management

- Two tower modules provide convenient access for high-volume supplies (Supply Tower/IV Tower and catheter)
- Supply Tower integrates with MedSelect nursing cabinets for a comprehensive storage and tracking system

Flexible design saves time and space

- Sliding and fixed shelves feature solid bottom construction that reduces product tips
- Can share the same server as MedSelect cabinets for cost savings

Two dispensing methods

- *Find It* helps staff locate supplies via the touch screen
- *Take It* gives authorized staff faster, unlimited access to supplies; ideal for ER or OR where timeliness is critical

Centrack™ automated narcotics management

Centrack software provides comprehensive controlled substance management and documentation. Centrack turns almost any MedSelect dispensing cabinet into the ideal medication vault to safeguard your facility's narcotics.

Complete narcotics tracking

- Monitor the entire lifecycle of a controlled medication from inventory to patient administration, plus returns
- Track staff members' history over time and across dispensing locations

Integrates with MedSelect cabinets or existing vault

- Build your vault using any number of MedSelect cabinets or towers or, if your facility already operates a vault and MedSelect equipment, a software-only option saves costs
- Multiple size drawer modules isolate single items for the most secure storage

Custom reporting

- Track the dispensing and restocking of any controlled substance throughout its entire lifecycle
- Track staff members' dispensing history
- All reports are customizable for maximum flexibility
